Part II

The University's Graduate Attributes and seven Generic Intended Learning Outcomes (GILOs) represent the attributes of ideal EdUHK graduates and their expected qualities respectively. Learning outcomes work coherently at the University (GILOs), programme (Programme Intended Learning Outcomes) and course (Course Intended Learning Outcomes) levels to achieve the goal of nurturing students with important graduate attributes.

In gist, the Graduate Attributes for Sub-degree, Undergraduate, Taught Postgraduate, Professional Doctorate and Research Postgraduate students consist of the following three domains (i.e. in short "PEER & I"):

- Professional Excellence;
- Ethical Responsibility; &
- Innovation.

The descriptors under these three domains are different for the three groups of students in order to reflect the respective level of Graduate Attributes.

The seven GILOs are:

1. Problem Solving Skills
2. Critical Thinking Skills
3. Creative Thinking Skills
- 4a. Oral Communication Skills
- 4b. Written Communication Skills
5. Social Interaction Skills
6. Ethical Decision Making
7. Global Perspectives

1. Course Synopsis

This course is a continuation of the Capstone Project I: Research Methods and Proposal, and serves as a culminating academic and intellectual experience for students. It is an inquiry-oriented learning avenue that enables our students to consolidate, integrate, and reflect on their undergraduate experiences for transiting to (and even celebrating) their upcoming post-graduation life –such as entering the workplace. Students are expected to complete an individual project. They will first refine their original project proposal from Capstone Project I: Research Methods and Proposal. By the end of the course, they are expected to create a project output, present on it, and submit a project report.

2. Course Intended Learning Outcomes (CILOs)

Upon completion of this course, students will be able to:

- CILO₁ demonstrate good understanding of the knowledge and main ideas of their Major/ Programme/ Education Studies (closure)
- CILO₂ demonstrate their research, analytical and higher order thinking skills (e.g., problem solving, creative thinking, critical thinking, ethical decision making, etc.) in the processes of research and/or inquiry
- CILO₃ synthesize and/or make connections of the content, knowledge and skills from prior courses in a broader context as a “meaningful whole” (integration)
- CILO₄ apply and generate new understandings of their future profession (reflection and transition)
- CILO₅ consolidate and generate insights on personal identity in relation to the future profession (reflection and transition)
